

The Solar System

There are eight planets in our solar system: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

The sun is at the center of our solar system. It is a star and all the planets go around it. Earth is the planet people live on.

Mercury is **the closest** planet to the sun. It's also **the smallest** planet. Mercury is very hot, but **the hottest** planet is Venus. Saturn, Uranus and Neptune are **the coldest** planets. Neptune is also **the farthest** planet from the Sun.

Saturn, Uranus and Neptune are very big, but Jupiter is **the biggest** planet of all.
