SAVE THE SAILORS

Match the Investigation Steps

Name: _____ Class: _____ Date: _____

THE TASK

Match each step in an investigation with what we did in the scurvy activity.

Write the correct letter or draw lines to match.

Steps in an investigation

1. Observe a problem ☐
2. Form a theory ☐
3. Plan a fair test ☐
4. Carry out the test ☐
5. Analyse the results ☐
6. Draw a conclusion ☐

What we did

A. The evidence showed that oranges and lemons worked best.

B. The results from the six groups were compared.

C. The sailors had scurvy and needed help.

D. Each group received its treatment.

E. The idea was that something was missing from the sailors' diet.

F. The sailors were divided into groups, given different treatments, and kept under similar conditions.

Key word

A theory is a scientific idea that can be tested.
