Date: _____	Score: _____

Aesthetic Visual & Identification Guide

Part A: Audio Text Fill-In-The-Blank (Kalimat Rumpang)

Instructions: Listen carefully to the audio monologue about Bekantan. Fill in the missing words (1-10) with the exact words you hear from the audio track.

Today, we are going to learn about a unique animal from Kalimantan. It is the **Bekantan**. Bekantan is a reddish-brown monkey with a very (1) _____ and big nose. Because of its unique nose shape, people also call it the (2) _____ monkey.

Bekantan is a relatively large primate. Male bekantans can weigh around (3) _____ to 22 kilograms, while females are (4) _____, weighing only about 10 to 12 kilograms.

They are (5) _____ animals. This means that they spend most of their time up in the (6) _____. They eat, sleep, and play high up in the branches. Their main food source is (7) _____ leaves, but they also eat fruits and (8) _____.

Sadly, the population of Bekantan is (9) _____. They are losing their natural homes because people cut down the forests. Right now, Bekantan is listed as an (10) _____ species, which means we must protect them from extinction.

Part B: Critical Thinking & Inference (HOTS)

Instructions: Analyze the text you have completed above to solve the following critical questions.

11. Why does human industrial expansion in mangrove forests directly cause a collapse in the Bekantan population?

Answer: _____

12. Based on the concept of 'arboreal animals', what would happen to the daily life, sleeping habits, and safety of Bekantans if their forest canopy was completely destroyed?

Answer: _____
