PART 1 **12 POINT OVER 100**

READING Read the article and complete the gaps with paragraph headings a–f.

1_____ These days, identity theft through the internet is a very real danger. While some people are cautious about the websites they use and the information they share, others are not.

2_____ The criminals who target us know exactly what they are looking for. They also have a very clear idea of how they will use our information. The biggest problem is that we don't understand exactly what information they are trying to find. Perhaps if we did, we'd be more careful when using the internet.

3 _____ So, what can we do to keep our identity safe online? Well, the first piece of advice would be to install anti-virus software on the equipment you are using and to make sure it's kept up-to-date.

4_____Second, it's important to create new passwords for different websites. Never use the same one for two sites or purposes, especially the one which accesses your main email account.

5_____Remember also to only use secure online sites when you shop online and to use public wi-fi with extreme caution. People don't realise that when they're using this, it is incredibly easy for hackers to access their data. You should only use wi-fi hotspots* for things you don't mind being public.

6_____So, the next time you're about to do some online banking or type in a password for a social networking site, stop and think. Ask yourself if you really want all the information you're about to share to go public.

* a physical location giving wireless internet Access.

a) Diversify access **d)** Remember where you are
b) A modern threat **e)** Public vulnerability
c) Discriminate thieves **f)** Protect your equipment

PART 2
Complete the text with the correct answer, a), b) or c). 10 POINT OVER 100
