

Maths Activities

Area and Perimeter

Area and Perimeter of a Rectangle

Area = length $\times$ width

Perimeter = $2 \times$ length + $2 \times$ width

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm

Area = $10 \times 5 = 50$ cm²

Perimeter = $2 \times 10 + 2 \times 5 = 30$ cm
