Maths Activities

Area and Perimeter

Area and Perimeter of a Rectangle

Area is the amount of space a shape takes up. Perimeter is the distance around a shape.

Area = length $\times$ width

Perimeter = length $\times$ 2 + width $\times$ 2

Example: A rectangle has a length of 5cm and a width of 3cm.

Area = 5 $\times$ 3 = 15 cm^2

Perimeter = 5 $\times$ 2 + 3 $\times$ 2 = 10 + 6 = 16 cm

Example: A rectangle has a length of 8cm and a width of 4cm.

Area = 8 $\times$ 4 = 32 cm^2

Perimeter = 8 $\times$ 2 + 4 $\times$ 2 = 16 + 8 = 24 cm
