

Time: Do the past, present, and future exist all at once? | Big Think

1. How can you say time doesn't _____, when we have such a _____ experience of it, first of all. And second of all, we're talking about it _____
2. We work very hard to _____ time with all sorts of _____ clocks, but there is no question with our brains, which are wet _____ computers, we lose _____ of time
3. I at least _____ that I have an obligation to take that seriously, to listen to it. And _____ do argue about these things, and it's _____ to argue about it
4. Where is still no consensus?

5. What was a hard thing in modern physics about a hundred years ago?

6. Is time subjective or objective. Make conclusion based on video you've watched
