

Steps to Turn Off the Computer Correctly.

We must turn off the computer properly so that it is not easily damaged.

Here are the steps we have to do:

1. First, click the "START" menu in the lower left corner of the screen.
2. Then click "shutdown".
3. Then select "OK".
4. Wait until the computer turns off.
5. After that press the button on the monitor and turn off the stabilizer after the computer shuts down.
6. Finally, unplug the cable from the power supply to cut off the current.

Have a great time turning off the computer properly!
