

ASSESSMENT- FORM 2 Respiratory System: Parts and Functions

1. Using the words provided, label the diagram below.

Lungs	diaphragm	Nose	larynx	pharynx
nasal cavity	Trachea	bronchioles	bronchi	

2. Match the parts of the respiratory system with the correct function.

PARTS	FUNCTIONS
1. Nose	This large muscle helps you fill and empty your lungs
2. Trachea	These little sacs are where carbon dioxide leaves the blood and oxygen enter it
3. Lungs	Entry point for air
4. Alveoli	Windpipe carrying air
5. Bronchi	Two large, and very important, organs inside your chest cavity.
6. Diaphragm	The tubes inside the lungs that lead to the alveoli
