

Venn Diagram Activity: Light Microscope vs Electron Microscope

Use the word bank to compare and contrast a light microscope and an electron microscope.

Type or drag each item into the correct part of the Venn diagram.

Word Bank

uses visible light

uses electrons

glass lenses

higher magnification

lower magnification

higher resolution

can observe living specimens

specimens must be dead

natural color images

used to observe tiny objects

produces magnified images

used in biology

helps scientists study cells

includes TEM and SEM
