☐ Independent Practice ☒ Assessment					

Answer the questions carefully!

1. Choose a colour and colour each chicken differently.

Multiply the number in each chicken by 10 or 100.

Then, colour the eggs with the correct answers matching the colour of the chicken.

[2]

2. Complete the table

	Multiply by 10	Multiply by 100
27	270	
843		84 300
560		

[2]

3. K Match the numbers that multiply to the answers.

An example has been done for you.

[2]

4. A storekeeper bought 45 cartons of canned drinks. Each carton has 100 cans. He repacked the cans into packs of 10. How many packs are there?

[1]

5. Find the answer using the appropriate multiplication facts given.

$$13 \times 6 = 78$$

$$2 \times 15 = 30$$

a. $26 \times 6 =$ _____

b. $8 \times 15 =$ _____

c. $6 \times 15 =$ _____

d. $130 \times 6 =$ _____

[2]

6. A movie ticket cost \$8.

A total of \$96 was collected from the sale of the tickets for the movie.

How many people watched the movie?

[1]

7. Use the clues to complete the cross-number puzzle.

Cross

(C) $2640 \div 20$

(E) $700 \div 100$

Down

(A) $910 \div 10$

(B) $7200 \div 600$

(D) $7400 \div 200$

Diagonal

(F) $2600 \div 100$

[2]

8. 79 pencils are divided into 6 stands equally.

How many pencils are there in each stand?

How many pencils are left?

[2]

9. Divide the number in each rabbit by 10 or 100.

Then, join each rabbit to the carrots containing the correct answers using a line.

[2]

10. There are 87 rulers.

7 rulers are packed into each bag.

How many bags of rulers are there?

How many rulers are left?

[2]

11. Connect the expressions with the same answer.

$7 \times 4 \times 5$ •

• 8×18

$8 \times 3 \times 6$ •

• 7×20

$9 \times 5 \times 8$ •

• 9×40

[2]

12. Safia puts 62 photos in photo frames.

Each photo frame holds 8 photos.

Write the number of photo frames she could completely fill.

_____ photo frames [1]
