

5- Read and correct

My name is Phillip. I`m 45 years old and I`m a science teacher. I work in a public school near my house in the mornings. On Monday and Thursdays afternoons, I meet other teachers and some students in the science club. There, we do different kinds of experiments and we try to learn more about science, technology and our world. We love doing experiments, especially with robots. The students write the codes to program the robots. We can teach the little machines to do simple tasks. For example, we "tell" them to read aloud, to write and to count to 100. There are many things we do in the science club. Students like it very much.

1- Philip is a robotics teacher.

He isn` t a robotic teacher. He is a science teacher.

He is a robotic teacher. He is not a science teacher.

2- He works in the evenings.

He doesn` t work in the evenings. He works in the mornings.

He works in the evenings. He doesn` t work in the mornings.

3- He stays at home in the afternoons.

He doesn` t stay at home in the afternoons. He goes to the science club.

He stays at home in the afternoons. He doesn` t go to the science club.

4- In the club only experiment with robots.

They don't only experiment with robots. They do different kinds of experiments.

They only experiment with robots. They don't do different kinds of experiments.

5- He programs the robots.

He doesn't program the robots. The students program the robots.

He programs the robots alone. The students don't program the robots.

6- Robots do very complex tasks.

They don't do very complex tasks. They do simple tasks.

They do very complex tasks. They don't do simple tasks.

7- Students hate the club.

They don't hate the club. They like it very much.

They really hate the science club. They don't like. It.
