

- Natural resources – Things from nature that we use (water, oil, wood, wind).
- Renewable energy – Energy that does not run out (solar, wind, hydro power).
- Wildlife – Wild animals and plants living in their natural environment.
- Endangered species – Animals or plants that might disappear forever.
- Deforestation – Cutting down large areas of forests.
- Overconsumption – Buying and using more than we actually need.
- To ban – To say that something is not allowed by law.
- To replace – To use something else (new or better instead of something old).
- To raise awareness – To help people know and understand a problem.
- To invest in – To put money or effort into something to make it better.
- To take action – To do something to solve a problem, not just talk about it.

Our Planet, Our Future: What Can We Do?

Our planet is facing serious problems, and we cannot just wait for other generations to fix everything. Every year, massive (1) _____ destroys the natural homes of (2) _____. Flora and fauna changes in destroyed area - animals have to relocate but lots of them can't survive in new living conditions. Changes in flora and fauna put many (3) _____, like tigers and certain birds, at great risk of disappearing forever.

The root of this problem is often our (4) _____. We use up the Earth's (5) _____ much faster than nature can recover them. People buy and throw away too much. Fast fashion leads to tons of textile waste, our planet is drowning in single-use plastics.

So, what is the solution? First, governments need (6) _____ single-use plastics in all shops. Furthermore, cities must revise the budget and (8) _____ (9) _____, like solar and wind power, to stop air pollution.

But it's not just about governments. We also need (7) _____ our old overconsuming habits with better ones - use reusable water bottles and bags, stop throwing away good paper, buy less unnecessary clothes. We can use social media to (10) _____ about these issues among our friends and other people. It is time for all of us (11) _____ before it is too late.
