

Making a Kite

Hello everyone! Today, I'm excited to show you how to make a (1) _____. It's a (2) _____ project, and it's (3) _____ to see something you made fly (4) _____ in the sky. You only need a few (5) _____, so let's get started!

To make a kite, you will need butcher cord, (6) _____, a sheet of strong (7) _____, wooden (8) _____ like bamboo, and a (9) _____.

First, you'll want to make a (10) _____ with the two sticks. This will be the (11) _____ of your kite.

Next, tie the sticks together with the butcher (12) _____. Make sure it's (13) _____ so your kite won't fall apart.

After that, using a (14) _____, cut a notch at each end of the sticks. This helps the (15) _____ stay in place.

Then, lay the (16) _____ paper flat and put the stick (17) _____ on top, face down. This is the (18) _____ of your kite.

To make a (19) _____, tie small (20) _____ every 10 centimeters along a piece of string. This keeps your kite (21) _____ when it flies.

Finally, use the marker to (22) _____ your kite. You can (23) _____ anything you like!

And that's it! You've (24) _____ your very own kite. Now, find a nice (25) _____ space, and it's time to fly it. I hope you enjoyed this project.
