

FOOD SHOPPING FOR MY EMERGENCY BACKPACK

FINAL CHALLENGE — Read each situation carefully and choose the best option.

QUESTION / SITUATION	ANSWER
1. SHOPPING LIST CHECK: The backpack is for three people. The list already has rice, two bottles of water and a jar of honey. You want to add one fruit that can be counted individually. Which option completes the list correctly?	
2. FIND THE PROBLEM: Four students wrote one sentence for the same shopping list. Which sentence has an error?	
3. CONTEXT MATTERS: There are many bottles of water in the store. You and your mother choose one specific bottle that is next to the emergency backpack. Which sentence correctly refers to it?	
4. UNIT DETECTIVE: The shopping list says: "250 ____ of flour and 1 ____ of potatoes." Which pair of units makes sense for the two foods?	
5. CHOOSE THE COMPLETE COMBINATION: You can choose only one option for the backpack. Which option has a correct article + container + food combination?	
6. GENERAL OR SPECIFIC? Your family usually stores rice for emergencies. You are making the shopping list, not referring to a particular bag in the store. Which sentence is correct?	
7. CORRECT THE WHOLE PLAN: A student wrote: "For the emergency backpack, I need an bottle of water, a apple and a kilo of rice." Which option corrects the whole sentence?	
8. COMPARE THE SHOPPING LISTS: Three lists are prepared for an emergency backpack. Which list is completely correct?	
9. MULTIPLE CLUES: You need to buy one fruit, 500 grams of flour and one container of milk. Which shopping choice follows all three requirements?	
10. FINAL DECISION: You are checking the final shopping list before preparing the emergency backpack. The list must include one countable fruit, an uncountable food, a suitable container of water, and a correct unit for potatoes. Which option meets all four requirements?
