

	3. What does the sign ask you to do? A. Turn off the lights to save energy. B. Leave the lights on all day. C. Open the windows to cool the room. D. Turn on more lights to see better.
	4. What does the sign mean? A. Use water carefully and don't waste it. B. Keep the tap running all the time. C. Drink only bottled water. D. Wash your car every day.
	5. What does the sign warn you about? A. You must not feed wild animals. B. You can feed animals any food you like. C. You should take animals home as pets. D. You should chase animals for fun.

Exercise 2: Read the following advertisement/ notice/ flyer/ announcement and mark the letter A, B, C or D to indicate the correct option that best fits each of the numbered blanks

Small Actions, Big Changes

Our environment needs our help. Every day, people throw trash on the streets and in parks. This makes our city look dirty and ugly. We decided (1)_____ a campaign about environmental protection at school.

It is not (2)_____ to help the environment. We can start with small actions like turning off lights when leaving rooms and using fewer plastic bags. My teacher teaches us about recycling paper, plastic, and glass.

At home, my family tries to save water and electricity every day. We also grow vegetables in (3)_____ small garden behind our house. The (4)_____ of the countryside is better than the noisy city. Fresh air and green trees make people feel relaxed and healthy.

Remember, protecting the environment is everyone's responsibility. Let's work together for a cleaner and greener world!

Exercise 3: Read the following passage and mark the letter A, B, C, or D to indicate the correct word that best fits each of the numbered blanks.

Saving Our Planet Together

Many people (1)_____ worried about climate change these days. The Earth's temperature is rising, ice caps are melting, and weather patterns are changing dramatically. (2)_____, it's not too late to take action and protect our environment. Schools and communities are making great (3)_____ to reduce pollution and save energy. Students organize clean-up campaigns in beaches and parks every month. They collect plastic bottles, paper, and other recyclable materials.

Teachers explain that we must act now (4)_____ future generations will suffer from our mistakes today.

Many families are changing their daily habits (5)_____ better ways. They use public transportation instead of driving cars, bring reusable bags to markets, and plant trees in their gardens. Some people even install solar panels on their (6)_____ to use clean energy from the sun.

Every small action counts. If everyone does their part, we can create a healthier planet for all living things. The power to change the world is in our hands!

Green Living in Our City

Last week, our school organized (1)_____ special event about environmental protection. Many students and teachers attended this meaningful program. Guest speakers who (2)_____ working on environmental projects for years shared their experiences with us.

The most interesting part was meeting environmental (3)_____ from different organizations. They taught us how to reduce waste and save water at home. One speaker showed us simple ways to recycle plastic bottles into useful things like pencil holders and flower pots. We also learned (4)_____ to our friends and family about protecting nature. Everyone agreed that environmental protection is very (5)_____ for our future. Small actions like turning off lights when leaving rooms, using less plastic bags, and planting trees can make a big difference. We don't need to wait - we should act (6)_____ to save our planet. After the event, our class decided to start a recycling club. We will meet every Friday to collect and sort waste materials. Together, we can make our school and community cleaner!

| 6. A. immediate | B. immediately | C. immediateness | D. immediacy |

Exercise 4: Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions.

Anna's Green Project

Anna is a 14-year-old student who loves nature. Last month, she started a special project at her school called "Green Warriors." She wanted to help protect the environment and teach other students about pollution problems.

First, Anna talked to her principal about her idea. The principal liked it and gave her permission to use the school garden. Anna and her friends cleaned the garden and planted twenty new trees. They also put recycling bins in every classroom. The bins were painted in three colors: blue for paper, yellow for plastic, and green for glass.

Every Monday, Anna organized meetings with interested students. They discussed environmental problems like air pollution, plastic waste, and global warming. In these meetings, students shared ideas about saving energy and water. Some students suggested turning off computers after class.

Others wanted to use both sides of paper when writing. The biggest challenge was changing students' habits. Many students threw garbage on the ground or forgot to use recycling bins. Anna didn't give up. She made colorful posters about environmental protection and put **them** around the school. She also created a fun competition between classes to collect the most recyclable materials.

After two months, Anna's project became very successful. Now, the school is much cleaner, and most students understand why protecting nature is important. Anna proved that one person can make a real difference!

1. Which of the following is the best title for the text?

Every day, students use too much plastic at school. Plastic bottles, bags, and food containers create tons of waste. (1) _____ This damages our environment and harms animals in the ocean.

Students can make simple changes to reduce plastic waste. First, bring a reusable water bottle to school instead of buying plastic bottles. (2) _____ You can refill it at water fountains during the day. This saves money and protects the environment.

For lunch, use reusable containers instead of plastic bags. Metal or glass containers keep food fresh and last for many years. (3) _____ Ask your parents to buy fruits without plastic packaging or choose items with less wrapping.

Schools can also help by organizing plastic-free days. Teachers and students work together to avoid single-use plastics. They can set up water stations and encourage everyone to bring their own cups. Some schools even create art projects using recycled plastic materials.

Remember that small actions make big differences. If every student reduces plastic use, we can save thousands of plastic items each year. (4) _____ Together, we can create a cleaner and healthier planet for future generations!

- A. Also, avoid buying snacks with too much plastic wrapping.
- B. Most of this plastic ends up in landfills or oceans.
- C. Share these ideas with friends and family to spread awareness.
- D. A good water bottle can be used for many years.

Saving Water at Home

Water is precious, but many people waste it every day. We use water for drinking, cooking, washing, and bathing. (1) _____ If we don't save water now, future generations will face serious problems.

There are easy ways to save water at home. Turn off the tap while brushing your teeth. This can save up to eight liters of water per minute. (2) _____ Fix dripping taps immediately because one dripping tap can waste 15 liters daily.

In the bathroom, take shorter showers instead of long baths. A five-minute shower uses much less water than filling a bathtub. (3) _____ You can also put a plastic bottle filled with water in your toilet tank to reduce water use.

Outside the house, collect rainwater in buckets or containers. Use this water for watering plants or washing your bicycle. Water your garden early in the morning or late in the evening when it's cooler. This prevents water from evaporating quickly.

Remember, every drop counts. If each family saves water, we can protect this valuable resource. (4) _____ Start today and encourage others to join you in saving water!

- A. Also, wash dishes in a bowl instead of under running water.
- B. However, only three percent of Earth's water is fresh water.
- C. Install water-saving shower heads to use even less water.
- D. Small changes in daily habits make a big difference.

❖ WRITING

Exercise 1: Reorder the words to make correct sentences.
