10. If he _____ late, we will start without him.

- A. arrives
B. arrived
C. will arrive
D. would arrive

3. Read and write the correct answer in the box.

Green School Challenge

Our school has started an environmental challenge. Every class must try to reduce waste for one month. Our science teacher explained that **if people reuse bottles and bags, they produce less trash**. Because this is generally true, she asked us to bring reusable containers to school every day.

Next Friday, our class will visit a local park. **If the weather is good, we will collect litter and plant small trees**. If it rains, we will stay at school and make posters about recycling instead.

Some students have proposed bigger projects. Carlos said that **if the school had more money, it would install solar panels on the roof**. Ana thinks that if every student brought a reusable bottle, the school could stop selling so many plastic bottles. The principal liked both ideas, but explained that larger projects need more money and planning.

Before this project, I thought environmental problems were too big for students to change. Now I understand that small actions can make a difference. **If everyone makes one better choice every day, our school becomes cleaner.**

EXAMEN
UTSV-DAC-FO-01

The principal has also promised that **if our project is successful this month, he will continue it next semester**. Our class is excited because we can see how simple decisions can create positive changes.

Choose the correct answer.

1. What is the main purpose of the Green School Challenge?

- A. To raise money for the school.
- B. To reduce waste and encourage environmentally responsible actions.
- C. To cancel classes for one month.
- D. To teach students how to build solar panels.

2. What will the class do if the weather is good next Friday?

- A. Stay at school and make posters.
- B. Sell reusable bottles.
- C. Collect litter and plant small trees.
- D. Visit another school.

3. What would the school do if it had more money, according to Carlos?

- A. Install solar panels.
- B. Build a new classroom.
- C. Buy more plastic bottles.
- D. Organize another picnic.

4. What has the writer learned from the project?

- A. Students cannot influence environmental problems.
- B. Only expensive projects are useful.
- C. Recycling is too difficult for students.
- D. Small actions can create positive changes.

5. What will happen if the project is successful this month?

- A. The school will close the project.
- B. The principal will continue it next semester.
- C. The students will stop recycling.
- D. The class will receive money.
