SMART SCHOOL TECHNOLOGY FAIR 2030

Discover the Future of Learning!

Dear students and teachers,

Have you ever wondered what schools (1)_____ look like in the future? Come and explore at our Smart School Technology Fair next Saturday!

Technology is (2)_____ the way we learn every day. At this fair, you will see incredible inventions that make studying more fun and (3)_____.

❖ What You Can Experience:

✓ Robot Teachers – These friendly robots can answer your questions and help you with homework. They never get tired or angry!

✓ Smart Tablets – These devices can turn your handwriting into digital text (4)_____. You won't need paper anymore!

✓ VR Learning Games – Put on a headset and travel to ancient Egypt or explore the human body from inside!

✓ AI Translation Earbuds – Talk to anyone in the world! These earbuds translate 50 languages in real time.

Last year, over 2,000 students visited our fair and they were very (5)_____ about the flying drone cameras. This year, we have something even better – a 3D printer that can create anything you draw! Our technology experts will give free workshops to teach you how to use these amazing tools. You will also receive (6)_____ special gift bag with tech samples inside.

❖ **Event Information:**

- ✓ Date: Saturday, February 20
- ✓ Time: 10:00 AM – 5:00 PM
- ✓ Location: City Convention Center, Hall B
- ✓ Tickets: Free for all students (bring your student ID)
- ✓ Register at: www.smartschoolfair2030.com

Don't miss this chance to see how technology will change education forever!

See you there!

TEEN TECH MAGAZINE - MONTHLY NEWSLETTER

Your Guide to the Digital World!

COVER STORY: How Teenagers Use Technology to Communicate

By: Sarah Mitchell, Tech Reporter

Hello readers!

This month, we interviewed 500 teenagers about their (1)_____ habits. The results are very interesting!

Ten years ago, people mainly used phones for calling. However, today's teenagers prefer (2)_____ messages and using social media apps. About 85% of teens said they check their phones within 10 minutes of waking up!

❖ **Popular Communication Apps Among Teens:**

App Type	Usage Rate
Instant Messaging	92%
Video Calling	78%
Social Media	88%
Email	45%

The survey also showed that teenagers are very (3)_____ in trying new technology. Many students said they want to use virtual reality for talking to friends who live far away.

"I video call my grandparents every weekend," said 14-year-old Tom from London. "Technology helps me stay (4)_____ with my family even though they live in another country."

However, experts warn that spending too much time on devices can affect your health. Dr. Lisa Chen, a technology researcher, suggests that teens should take breaks every 30 minutes and not use phones before bedtime.

❖ **Tips for Healthy Technology Use:**

- ✓ Set a daily time limit for screen use
- ✓ Turn off notifications during study time
- ✓ Use blue light filters in the evening
- ✓ Have face-to-face conversations with family

We believe technology is (5)_____ when we use it wisely. It can help us learn, connect with others, and explore the world. But remember to balance online and offline activities!

Next Month's Topic: Will AI Replace Human Communication?

Don't miss it!

— Teen Tech Magazine, Issue 45 —

1. A. communicate B. communicative C. communication D. communicator
2. A. send B. to send C. sending D. sent
3. A. interest B. interested C. interesting D. interestingly
4. A. connect B. connected C. connecting D. connection
5. A. help B. helpful C. helpless D. helpfully

Exercise 3: Read the following passage and mark the letter A, B, C, or D to indicate the correct word that best fits each of the numbered blanks.

1.

ROBOTS IN OUR DAILY LIVES

Robots are no longer just in science fiction movies. They are becoming part of our everyday lives and helping us in many (1)_____ ways.

At home, robot vacuum cleaners are very popular now. They can clean floors automatically while you are doing other things. Some families also have robot assistants that can play music, answer questions, and (2)_____ the lights. These smart devices make housework much easier for busy people.

In hospitals, robots help doctors perform difficult surgeries. They can work more (3)_____ than human hands because they never shake or get tired. Nurses use robots to deliver medicine to patients' rooms. This technology saves time and reduces mistakes.

(4)_____, robots are also changing education. In Japan and South Korea, some schools use robot teachers to help students learn English. These robots are very patient and can repeat lessons many times without getting bored.

Many people worry that robots will take their jobs. (5)_____, experts say robots will create new types of jobs too. People will need to learn how to build, program, and repair robots. Students who study technology today will have many opportunities tomorrow.

The relationship between humans and robots is becoming closer. Scientists predict that by 2040, most families (6)_____ at least one robot at home. Are you ready to welcome a robot into your life?

Question 1.A. difference B. differ C. different D. differently

Question 2.A. control B. controlling C. controlled D. to controlling

Question 3.A. accurate B. accuracy C. accurately D. accurateness

Question 4.A. However B. Therefore C. Although D. Besides

Question 5.A. Moreover B. However C. So D. Because

Question 6.A. have B. will have C. are having D. had

2.

SMART HOMES OF THE FUTURE

Imagine waking up in (1)_____ house that knows exactly what you need. Smart home technology is becoming more popular every year, and it will change how we live completely.

Twenty years ago, people (2)_____ about smart homes only in movies. Today, millions of families already use smart speakers, smart lights, and smart thermostats. These devices connect to the Internet and can be controlled by your voice or smartphone.

Many technology (3)_____ around the world are working on even more amazing inventions. In the future, your home will learn your daily habits automatically. It will turn on the coffee machine before you wake up and play your favorite music when you feel stressed.

Smart homes will also help people (4)_____ energy and money. Sensors will detect when rooms are empty and turn off lights immediately. Air conditioners will adjust the temperature based on the weather outside. Scientists believe these features will reduce electricity bills by up to 40 percent. For elderly people, smart homes are (5)_____ helpful. Voice assistants can remind them to take medicine on time. Smart cameras can alert family members if something unusual happens. Robots will help with cleaning and cooking, making daily life much easier.

The technology keeps improving (6)_____ every year. By 2035, experts predict that most new houses will be built with smart technology included. Are you excited about living in a smart home someday?

Question 1.A. a B. an C. the D. some

Question 2.A. hear B. heard C. have heard D. were hearing

Question 3.A. company B. Companies C. company's D. companying

Question 4.A. save B. saving C. to save D. saved

Question 5.A. special B. especial C. especially D. specialty

Question 6.A. rapid B. rapidly C. rapidity D. rapidness

Exercise 4: Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions.

1.

TEENAGERS AND ARTIFICIAL INTELLIGENCE

Artificial Intelligence, or AI, is everywhere in teenagers' lives today. From smartphone apps to video games, young people use AI technology every day without even realizing it.

A recent survey by Vietnam Youth Technology Center asked 2,000 students aged 13-16 about their AI usage. The results were surprising. Over 85 percent of teenagers use AI assistants like Siri or Google Assistant to search for information. About 70 percent use AI-powered apps to help **them** study, especially for learning English and Mathematics. These apps can explain difficult lessons and create practice exercises based on each student's level.

However, the survey also found some worrying problems. Many students spend too much time talking to AI chatbots instead of real friends. Some teenagers trust AI answers completely without checking if the information is correct. Teachers are concerned that students copy homework from AI tools rather than thinking independently.

Experts recommend that teenagers should use AI wisely. They suggest treating AI as a helpful assistant, not a replacement for human thinking. Students should always verify AI information from
