

**Question: 18**

CertyIQ

**HOTSPOT -**

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

| Name   | Type           | In organizational unit (OU) | Description                             |
|--------|----------------|-----------------------------|-----------------------------------------|
| User1  | User           | OU1                         | User1 is a member of Group1.            |
| User2  | User           | OU1                         | User2 is not a member of any groups.    |
| Group1 | Security group | OU2                         | User1 and Group2 are members of Group1. |
| Group2 | Security group | OU1                         | Group2 is a member of Group1.           |

You install Azure AD Connect. You configure the Domain and OU filtering settings as shown in the Domain and OU Filtering exhibit. (Click the Domain and OU Filtering tab.)

You install Azure AD Connect. You configure the Domain and OU filtering settings as shown in the Domain and OU Filtering exhibit. (Click the Domain and OU Filtering tab.)

The screenshot shows the 'Domain and OU filtering' configuration window in Microsoft Azure Active Directory Connect. The window has a dark title bar with the Microsoft Azure Active Directory Connect logo and window controls. On the left is a navigation pane with the following items: 'Welcome', 'Tasks', 'Connected to Azure AD', 'Sync', 'Connect Directories', 'Domain/OU Filtering' (highlighted in blue), 'Filtering', 'Optional Features', and 'Configure'. The main content area is titled 'Domain and OU filtering' and contains the following elements: a note stating 'If you change the OU-filtering configuration for a given directory, the next sync cycle will automatically perform full import on the directory.', a 'Directory:' dropdown menu set to 'contoso.com' with a 'Refresh Domains' button and a help icon to its right, two radio buttons for 'Sync all domains and OUs' (unselected) and 'Sync selected domains and OUs' (selected), and a tree view of the 'contoso.com' directory structure. The tree view shows the following items: 'contoso.com' (expanded), 'Builtin', 'Computers', 'Domain Controllers', 'ForeignSecurityPrincipals', 'Infrastructure', 'LostAndFound', 'Managed Service Accounts', 'OU1' (checked), 'OU2' (checked), 'Program Data', 'System', and 'Users'. At the bottom of the window are 'Previous' and 'Next' buttons.

**Question: 20**

CertyIQ

DRAG DROP -

You have a new Microsoft 365 tenant that uses a domain name of contoso.onmicrosoft.com.

You register the name contoso.com with a domain registrar.

You need to use contoso.com as the default domain name for new Microsoft 365 users.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

Delete the contoso.ommicrosoft.com domain.

Add a custom domain name of contoso.com.

Set the domain to primary.

Create a new TXT record in DNS.

Successfully verify the domain name.

**Answer Area**

You have an Azure Active Directory (Azure AD) tenant that has an Azure Active Directory Premium Plan 2 license. The tenant contains the users shown in the following table.

| Name   | Role                       |
|--------|----------------------------|
| Admin1 | Cloud device administrator |
| Admin2 | Device administrator       |
| User1  | <b>None</b>                |

You have the Device Settings shown in the following exhibit.

**Question: 26**

CertyIQ

**HOTSPOT -**

You have an Azure Active Directory (Azure AD) tenant and an Azure web app named App1.

You need to provide guest users with self-service sign-up for App1. The solution must meet the following requirements:

⇒ Guest users must be able to sign up by using a one-time password.

⇒ The users must provide their first name, last name, city, and email address during the sign-up process.

What should you configure in the Azure Active Directory admin center for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

One-time password:

|                                               |   |
|-----------------------------------------------|---|
|                                               | ▼ |
| A linked subscription                         |   |
| An identity provider                          |   |
| Azure AD Privileged Identity Management (PIM) |   |
| The External collaboration settings           |   |

User details:

|                       |   |
|-----------------------|---|
|                       | ▼ |

| The tenant properties |   |

### Question: 29

#### DRAG DROP -

You need to resolve the recent security incident issues.

What should you configure for each incident? To answer, drag the appropriate policy types to the correct issues. Each policy type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

#### Policy Types

An authentication method policy

A Conditional Access policy

A sign-in risk policy

A user risk policy

#### Answer Area

Leaked credentials:

A sign-in from a suspicious browser:

Resources accessed from an  
anonymous IP address:

**Question: 30****HOTSPOT -**

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

| Name  | User type | Directory synced |
|-------|-----------|------------------|
| User1 | Member    | Yes              |
| User2 | Member    | No               |
| User3 | Guest     | No               |

For which users can you configure the Job title property and the Usage location property in Azure AD? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Job title property:

User2 only

User1 and User2 only

User2 and User3 only

User1, User2, and User3

Usage location property:

User2 only

User1 and User2 only

User2 and User3 only

User1, User2, and User3

## DRAG DROP

-

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2. You need to ensure that User1 can create access reviews for groups, and that User2 can review the history report for all the completed access reviews. The solution must use the principle of least privilege. Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Roles****Answer Area**

User2:

**Question: 35**

CertyIQ

**HOTSPOT**

-

You have an Azure subscription.

You need to create two custom roles named Role1 and Role2. The solution must meet the following requirements:

- Users that are assigned Role1 can create or delete instances of Azure Container Apps.
- Users that are assigned Role2 can enforce adaptive network hardening rules.

Which resource provider permissions are required for each role? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

Role1:  ▼

- Microsoft.App
- Microsoft.Compute
- Microsoft.Management
- Microsoft.Security

Role2:  ▼

- Microsoft.App
- Microsoft.Compute
- Microsoft.Network
- Microsoft.Security
