Kim Face-to-face Learning

I think face-to-face learning is better than online learning because I can communicate with teachers and other classmates **immediately** and directly when I have questions. In class, I can work in groups and discuss with friends. This helps me understand the lesson better. When I have a problem, I can ask for answers or help immediately. I can't do this in online classes. I have to email my teachers and wait for their reply. Learning in a traditional classroom also has fewer **distractions** than learning online. My teachers have many **strategies** to keep us focused on the lessons. I really enjoy my lessons and learn a lot.

Laura Online & Blended Learning

I think online learning has more advantages than disadvantages. My school is trying to change from face-to-face to **blended** learning, so sometimes we have online classes. I don't have to go to school, but I don't feel I'm missing any lessons by taking online classes. Furthermore, I think I learn online as much as I learn in a traditional class. I can't talk to my teacher and classmates, but I can email them at any time. I also have an online **discussion board** where I can exchange comments and ideas about my projects with my classmates. The only disadvantage is I really need to have a fast Internet **connection**.
