2. The following pictures show the ways of protecting our skeletal system EXCEPT...

3. Figure 3 shows Afq falling from his bicycle.

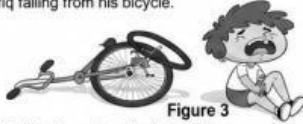

Figure 3

What problems might Afq face after this incident?

- A Having trouble to breath.
B Having trouble to walk and run.
C Having trouble in defecating.
D Will be scolded by his parents.

4. Figure 4 shows a component of human blood circulatory system.

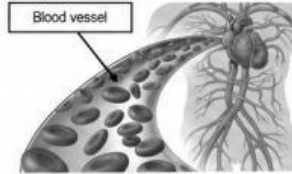

Figure 4

Which of the following statement shows the function of blood vessel?

- A To allow gas exchange
B To pump the blood to the lungs and whole body
C To transport blood to the whole body
D To transport waste product to the whole body
5. The digestive system depends on the _____ to transport food and nutrients throughout the body.
- A Skeletal system
B Blood circulatory system
C Respiratory system
D Joints and muscles

6. Figure 5 shows a caterpillar.

Figure 5

How the caterpillar protect itself from enemies?

- A Pretend to die.
B Producing bad smell.
C Has fake eyes.
D Has sharp horns.

7. The following information shows how animal X and Y protect themselves from extreme weather.

X : Wallowing in mud
Y : Thick layers of fat

Which of the following represents X and Y?

	X	Y
A		
B		
C		
D		

8. Figure 6 shows some migratory birds.

Figure 6

During winter, the migratory birds migrate to other places.

Why the birds migrate to other places?

- A To avoid extreme weather.
B To lay eggs.
C To protect themselves from enemies.
