A colored sample is provided as a reference for our child.

Recommended Print: Up to A4

No. of activity pages: 10

What are GERMS?

Germs are tiny living things that can make us sick.

How do GERMS spread to another person?

Germs can spread through sneezing, coughing, touching, or sharing items like toys and utensils.

**What can you do to
prevent the spread of GERMS
when you cough or sneeze?**

Cover your mouth and nose with a handkerchief and
tissue to prevent the spread of germs.

Are all GERMS bad for you?

No, some germs can be helpful to our stomach and improve our immune system.

Why does GERMS make me sick?

Germs can enter our bodies and produce toxins that can make us sick.

Name the common types of GERMS

Different types of germs includes bacteria, viruses, and fungi.
