

We Live in a Simulation. The evidence is everywhere. All you have to do is look

1. What made God decide to _____ his fingers or _____ his nose, or _____ he did to make everything happen
2. As you _____ deeper, you find computer code _____ in the _____ of the cosmos into the _____ that we want to use to describe the cosmos
3. For years scientists _____ that the electrons were _____ with each other causing the wave _____
4. When you think of the simulation creator as an _____ intelligence who _____ outside of our understanding of space and time, it sounds an _____ lot like you're describing _____
5. What may sound far-fetched at first glance?

6. Where can we find the golden ratio?

7. What is sneaky in the double-slit experiment?
