UNIT 4: LESSON 3
PRACTICE READING

Read the passage and then answer the following questions.

In Chennai, India, you can visit a very unusual place. Robot is a restaurant where some of the waiters aren't people – they're robots. It's the first robot restaurant in India. The restaurant opened in November 2017 and it's very popular. Lots of people want to eat there and see the robots. There are twenty tables at Robot and there are always queues of people waiting outside the restaurant every evening.

There are four robots at the restaurant. They are white and blue, and have got red eyes. Each robot wears a blue, red, purple or pink scarf. Customers use tablets on their tables to order their food. The tablets send the information to the kitchen, where chefs prepare their meals. When the food is ready, the chefs give it to the robots. The robots then take the food to the tables. If someone stands in front of a robot, it stops and waits. When the robots arrive at the tables, human waiters take the food from the robots and give it to the customers. At the end of the meal, the robots take the dirty plates back to the kitchen.

What do you think? Would you like to get your food from a robot waiter?

Match the word with definition.

unusual	order	queue	waiter	meal	customer	chef
---------	-------	-------	--------	------	----------	------
