

### READING TASK: Life in the Green Cities of 2050

Experts predict that by the year 2050, our urban life will change completely. **There will be** massive improvements in how we travel and live. For example, **there will be** fewer petrol cars on the roads. Instead, most people will use autonomous electric buses or flying taxis. Because of this, scientists promise that **there won't be** as much air pollution in big cities as there is today.

Housing will also be very different. **There will be** more vertical gardens on skyscrapers to produce clean oxygen and grow food. However, some people are worried about space. **Will there be** enough houses for everyone? Architects say yes, because **there will be** underground residential areas and smart micro-apartments.

### ANSWER THE FOLLOWING QUESTIONS:

**1. According to the text about Green Cities of 2050, which statement correctly describes what we can expect to see in these future urban areas?**

- A. There will be many petrol cars on every street.
