LIVEWORKSHEETS

Life on a Mountain

The Top It's the coldest and windiest part. Not many plants grow here. On some very high mountains, such as Mont Blanc, there's snow at the top all year! Some birds, such as eagles, live here.

The Middle It's colder than the bottom. Only small plants grow here. Some mountains have a lot of flowers, like the Rocky Mountains in North America. There are fewer animals, but some goats and rabbits live here.

The Bottom Many plants and flowers grow at the bottom because it's the warmest part. There are some forests with tall trees, such as in the Carpathian Mountains in Europe. Animals like deer and foxes live here.

1 Read the text. Choose *T* (true) or *F* (false).

1 The top is the coldest and windiest part of a mountain. **T / F**

2 There is snow at the top of some mountains. **T / F**

3 There aren't any birds at the top of mountains. Only **T / F**

4 goats live in the middle part of a mountain. **T / F**

5 Many plants and flowers grow at the bottom of a mountain. **T / F**

6 The bottom of a mountain is the coldest part. **T / F**

2 Read the text again. Choose the correct options.

1 *What's an example of a mountain with snow at the top all year?*

a the Carpathian **b** Mont Blanc

2 *What evidence tells you why only small plants and flowers grow in the middle of a mountain?*

a It's colder than the top of a mountain.

b It's colder than the bottom of a mountain.

3 *What evidence tells you why many animals live at the bottom of mountains?*

a It's the warmest place on a mountain.

b It's the windiest place on a mountain.

4 *What's an example of an animal that lives at the bottom of a mountain?*

a deer **b** goat
