1 Digestion

REINFORCEMENT WORKSHEET

NAME ..... DATE .....

REVISE pages 16–17 before you start.

1 Look at the drawing and complete the text in the boxes.

It contains the teeth and the tongue.

It produces bile.

It connects to the outside of the body via the anus.

They produce saliva.

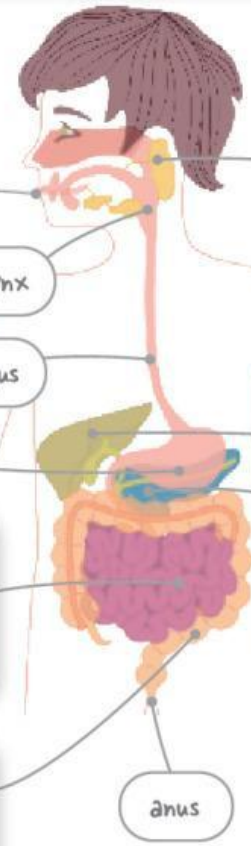

It produces pancreatic juice.

It is a long, thin tube that is tightly folded.

It connects the oesophagus to the small intestine.

DIGESTIVE TRACT

ACCESSORY GLANDS

The mouth .....

LIVEWORKSHEETS

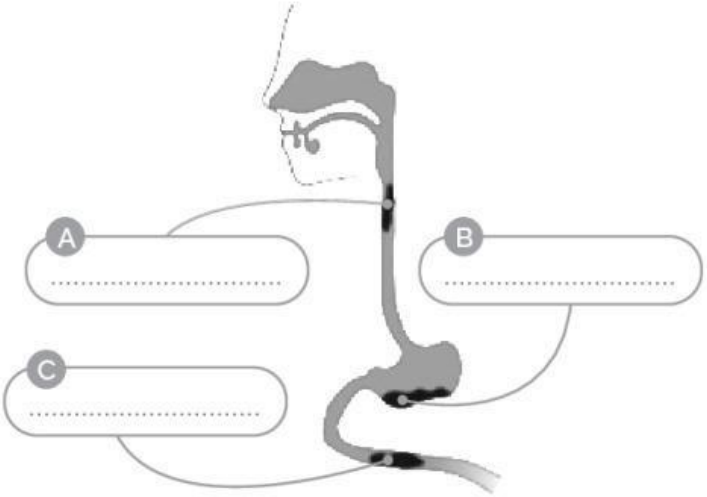

3 Match the sentences about the stages of the digestion process. Then write them.

In digestion,	nutrients pass through the walls of the small intestine and enter the blood.	It takes place in the large intestine.
In absorption,	food that is not digested is expelled outside the body.	It takes place in the mouth, the stomach and the small intestine.
In elimination of waste,	food breaks down into its nutrients.	It takes place in the small intestine.

- In digestion, ...

- In absorption, ...
.....
.....
- In elimination of waste, ...
.....
.....

4 Read the text and label the drawing.

In the mouth the food is chewed. The teeth, tongue and saliva turn the food into a bolus. In the stomach, gastric juices turn the bolus into chyme. The chyme passes into the small intestine where intestinal juice, bile and pancreatic juice turn it into chyle.

FINISH UP. In your notebook, do a simple drawing of the digestive system and label its parts.
