Name : _____

Class : _____

SCIENCE REVISION
Grade 3

Read each question carefully and select the correct answer by marking the checkbox. (1 point each)

1. What are the three main types of rocks called?
- [ ] Igneous, Sedimentary, and Metamorphic
- [ ] Sandstone, Limestone, and Granite
- [ ] Magma, Sediment, and Mineral

2. If a rock was formed by layers of sand and small stones being compressed over time, what do we call that kind of rock?
- [ ] Igneous
- [ ] Sedimentary
- [ ] Metamorphic

3. True or False: Pumice is a type of igneous rock that can sometimes float in water?
- [ ] True
- [ ] False

4. True or False: The rocks near the surface of the Earth are softer than the rocks further down?
- [ ] True
- [ ] False

5. What do we call rocks formed by being exposed to pressure and heat?

- [ ] Igneous Rocks
- [ ] Metamorphic Rocks
- [ ] Sedimentary Rocks

6.Sort the organisms in the left column into the correct category.

Palm Tree		Consumer	Producer
Eagle			
Mouse			
Mango Tree			
Grass			
Elephant			
Cheetah			
Ficus Tree			
Tiger			
Mosquito			

7.If a habitat has a population of 100 rabbits, how many foxes can that habitat support?

- ☐ 5 Foxes
- ☐ 10 Foxes
- ☐ 50 Foxes

LIVEWORKSHEETS

8.What do we call living things that make their own food?

☐ Producers

☐ Consumers

☐ Predators

9.What do we call the number of living things that live in the same place?

☐ Distribution

☐ Population

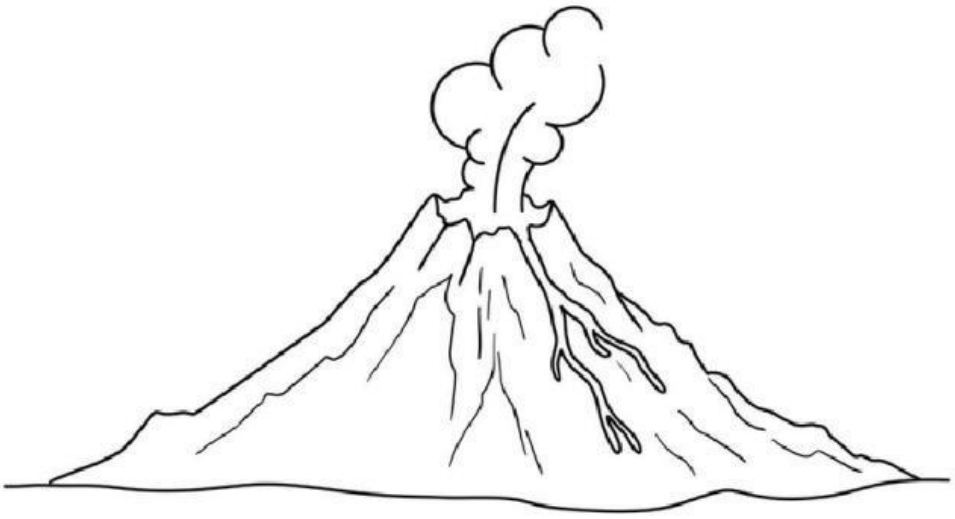

☐ Organisms

10. Which rock is formed by molten rock (magma) cooling slowly?

☐ Granite

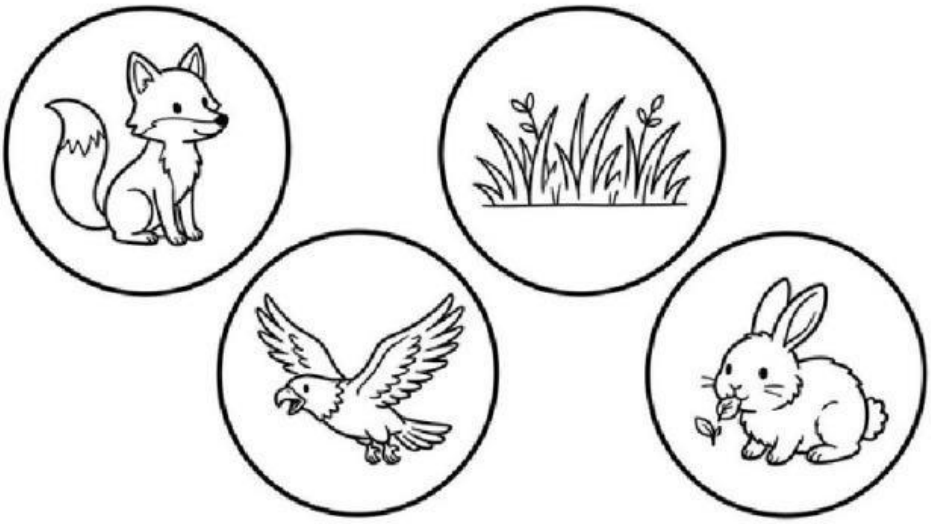

☐ Diamonds

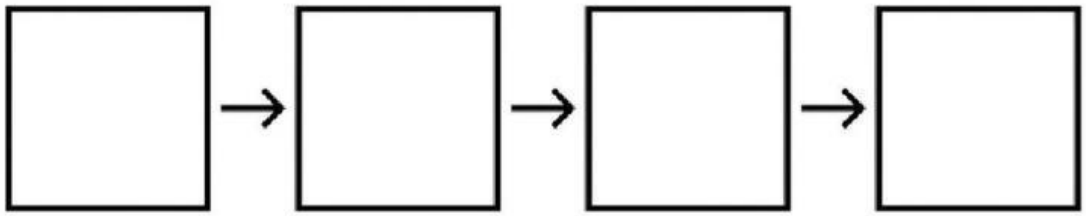

☐ Sedimentary
