ENERGY CONVERSION

All matter holds energy. This energy undergoes conversion when it changes from one form to another. In a new form, the energy can be utilised through other means.

Electrical energy makes appliances and gadgets we use every day function.

Chemical energy of different substances can power things that help cook our food or even take us places.

"Forms and Changes of Energy." CK-12, 2017, https://www.ck12.org/book/ck-12-fourth-grade-science/section/1.3/.
