# The Water Cycle

## Water is always moving!

Look at the diagram below and use it to answer the questions.

**1** What is the water cycle?
Explain in your own words.

**2** Name the process where water changes from a liquid into a gas. How does it happen?

**3** What is condensation? Why does it happen?

**4** What is precipitation? Give two examples.

**5** What is run-off? How does it help the water cycle?

**6** Why do you think the water cycle is important?

**Think like a Scientist!** *What might happen if there were no sun?*
