GE8 EOT1 LISTENING AND READING PRACTICE 1

A. LISTENING:

For each question, choose the correct answer.

You will hear an interview with a 16-year-old girl called Jenny, who went on a school exchange to America for a month.

20 Why did Jenny get involved in the school exchange project? A to get the chance to travel to many different countries B to see if she liked the American way of life C to see what being away from her parents was like	**21 How did Jenny's parents deal with her going to America for a month?** A They were very worried. B They tried to stop her from going. C They supported her.
22 Who did Jenny live with in America? A a family with lots of children B a family with three children and two dogs C a couple with no children and two dogs	**23 How was the home in America different from Jenny's home in England?** A bigger and more beautiful B more beautiful and less noisy C more noisy with a smaller garden
24 What Jenny missed most was A her family. B her friends. C her dog.	**25 What did Jenny gain from the exchange project?** A new friends B confidence C a job

LIVEWORKSHEETS

For each question, write the correct answer in the gap. Write one or two words or a number or a date or a time.

You will hear a woman talking about tours of historic houses in the south of England.

HISTORIC TOURS

South Elmham House

It was built around the 1300s, but it was greatly improved in the (14) ..... .

It must have been the home of a (15) ....., as its wall paintings suggest.

Haughley Hall

One of its best features is the secret (16) ..... in the walls.

Tours take place at 11.30 and 2 pm and are £15 with a (17) ....., or £12 with tea.

Bedfield House

Gardens are joined by (18) ..... .

Tours start at 10.30 and 2.30 and one has to pay £ (19) ..... .

B. READING

Welcome to the home of the future

The *2009 British Homes Awards* challenged the industry to design a house that can adapt to different life stages.

The participants were asked to rethink the construction and design of individual homes, so that they were easily adaptable to less mobile inhabitants, and also to create communities in which ageing occupants could continue to enjoy shared amenities.

The top design also had to be attractive to its potential buyers, because the competition was put to the public vote.

The winner, gaining 12,000 votes from Mail on Sunday readers, was the strikingly modern SunnySideUp, designed by Kosi Architects. Here are its three main features:

1. Upside Down House

1. **According to the article, The British Homes Awards challenged architects to design a house**

A. for disabled people
B. for ageing inhabitants
C. that could adapt to all ages
D. for young families with children

2. **According to the article, in the winning property, bedrooms are downstairs to**

A. benefit from the view
B. have easier access to the house
C. have more privacy in the living room
D. keep the same pleasant atmosphere the whole day

LIVEWORKSHEETS

The architects took as a starting point the accepted norm for a house – rows of houses facing onto streets crammed with cars, with living rooms on the ground floor and bedrooms above. Then they scrapped it.

They ended up with the living room, dining room and kitchen on the top floor where they can benefit from the light and views, and maximise energy efficiency. And they put the bedrooms on the ground floor where the garden aspect gives inhabitants increased privacy, and a cool temperature is maintained throughout the day. The two floors are linked by wide, gentle gradient stairs, which are designed to allow for a stair lift to be fitted if necessary as owners age.

2. Concealed Parking Spaces

But the feature that, according to Warren Rosing, one of the Kosi architects responsible for the design, was particularly popular with the public, is actually the parking.

In a SunnySideUp development no one has to look out onto a street full of cars, or worry about their kids being run over, because the terrace zone at the first floor level link all the homes and is a car-free zone.

Vehicles are tucked away on the lower floor, leaving safe and pleasant spaces outside the houses for people to meet, and kids to play.

A lift takes people directly from garage to living area, so that all residents, including the elderly and those with heavy shopping, can move comfortably between the floors. The natural feel of the front area is enhanced by the planters that are placed outside the kitchens at the front to encourage residents to grow vegetables and flowers where they can be seen.

The idea is that not only would they look pretty, but they would be a talking point, encouraging interaction between residents on the terrace area outside.

3. Flexible Spaces

But it's the fact that the space is designed to adapt to the changing needs, including the fluctuating income of its owners, that makes it a thought-provoking, as well as a winning, design.

3. **According to the article, the parking spaces in this house design are**

A. on the first floor
B. on the ground floor
C. in a separate building
D. in the street

4. **According to the article, in the SunnySideUp house the ground floor**

A. can be rented
B. can be sold separately
C. is only used to store cars
D. has a room for grandparents

5. We learn from the article that

A. children can play safely outside the house
B. the houses overlook a street crammed with cars
C. the back garden is the main talking point for the inhabitants

6. **According to the article, the house has been designed**

A. to be rented
B. to be shared if necessary
C. for families with a small income

7. **According to the article, the SunnySideUp development**

A. is being built
B. will never be built
C. will hopefully be built
D. has been recently built

LIVEWORKSHEETS

The lower-floor bedrooms have separate outdoor access so they can be easily let. The idea is that owners can get some extra money to pay for their mortgages during the first years. And later in the future, those bedrooms can be used as a granny flat, or an office, and can easily be converted into a separate one-bed flat if your kids won't leave home. And if more space is required, as well as the usual loft that can be converted, there is potential for a gallery floor to be inserted in the living room. **4. Where can you get one?** At the moment the SunnySideUp house is still just a set of drawings. But Warren Rosing says, "We are hoping to have it built." The organisers are in talks with builders, but due to the economic climate it may take longer than we would like." We're sure it will be worth the wait" they say.
