READING COMPREHENSION

My School

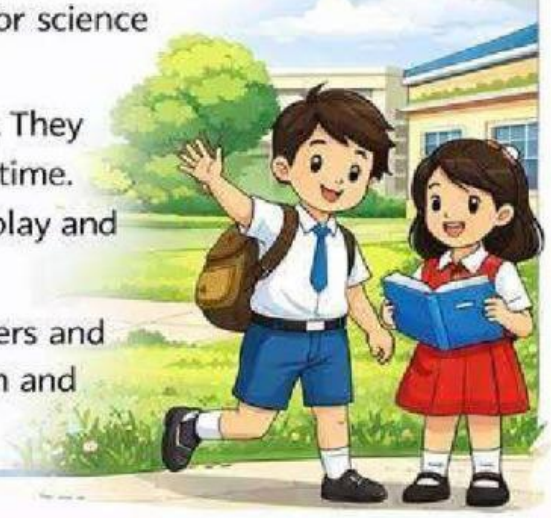

My school is a nice place to study. It has many rooms and facilities. There are classrooms, a library, a laboratory, and a canteen.

Students study in the classroom with their teachers. The library is a quiet place where students can read books and do homework. The laboratory is used for science experiments.

The canteen is a popular place for students. They buy food and drinks there during the break time. There is also a playground where students play and relax with their friends.

My school also has a parking area for teachers and students. I love my school because it is clean and comfortable.
