

Sumas

decenas completas + números de dos cifras

$$20 + 23$$

Descompongo en mi cabeza el número 23:

$$20 + 20 + 3$$

$$20 + 20 =$$

$$+ 3 =$$

Otro ejemplo:

$$50 + 35 =$$

$$50 + 30 + 5$$

$$50 + 30 =$$

$$+ 5 =$$

Y otro más:

$$60 + 17 =$$

$$60 + \quad + \quad =$$

$$60 + \quad =$$

$$+ \quad =$$

Ahora vamos a practicar:

$30 + 44 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$60 + 26 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$50 + 44 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$30 + 28 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$40 + 31 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$60 + 18 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$30 + 39 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$50 + 28 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$30 + 32 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

$70 + 25 =$

$+ \quad + \quad =$

$+ \quad =$

$+ \quad =$

Y ahora con un paso menos

$$20 + 36 =$$

$$20 + 30 =$$

$$+ 6 =$$

$$80 + 13 =$$

$$+ =$$

$$+ =$$

$$30 + 18 =$$

$$+ =$$

$$+ =$$

$$60 + 44 =$$

$$+ =$$

$$+ =$$

$$60 + 26 =$$

$$+ =$$

$$+ =$$

$$30 + 41 =$$

$$+ =$$

$$+ =$$

$$30 + 42 =$$

$$+ =$$

$$+ =$$

$$20 + 51 =$$

$$+ =$$

$$+ =$$

$$50 + 14 =$$

$$+ =$$

$$+ =$$

$$60 + 25 =$$

$$+ =$$

$$+ =$$

Y ahora ya en un solo paso:

$$50 + 14 =$$

$$30 + 24 =$$

$$60 + 18 =$$

$$20 + 46 =$$

$$20 + 14 =$$

$$50 + 27 =$$

$$60 + 12 =$$

$$70 + 21 =$$

$$50 + 44 =$$

$$50 + 13 =$$

$$30 + 32 =$$
