

Solve the following equations

|                               |                               |
|-------------------------------|-------------------------------|
| $g + 4 = 5$<br><br>g =        | $2c = 18$<br><br>c =          |
| $t - 11 = 5$<br><br>t =       | $\frac{p}{7} = 8$<br><br>p =  |
| $9b = 72$<br><br>b =          | $h + 5 = -4$<br><br>h =       |
| $\frac{a}{11} = 7$<br><br>a = | $10d = 60$<br><br>d =         |
| $g + 5 = -11$<br><br>g =      | $20f = 100$<br><br>f =        |
| $z - 2 = 1$<br><br>z =        | $\frac{s}{6} = 12$<br><br>s = |
| $8a = 40$<br><br>a =          | $\frac{w}{10} = 3$<br><br>w = |
| $e + 6 = -7$<br><br>e =       | $q - 3 = -12$<br><br>q =      |
