

Rounding Tenths to the nearest Whole Number

Follow these simple steps to round a number to the nearest one:

- if the number is already a multiple of 1, don't change it!
- if the tenths digit is less than 5 then the number is rounded down. Simply remove the decimal part of the number.
- if the tenths digit is 5 or more, the number is rounded up. Simply add one to the ones digit and remove the decimal part of the number.

Examples

2.7 is rounded **up** to 3 because the tenths digit is 7.

5.3 is rounded **down** to 5 because the tenths digit is 3.

3.0 is unchanged because it is already a multiple of 1.

5.5 is rounded **up** to 6 because the tenths digit is 5.
