

A partir de la información entregada, pinta de color naranja la zona cálida, de color verde la zona templada y de color celeste la zona fría de la Tierra. Luego, escribe en el espacio asignado el nombre de la zona correspondiente.

The diagram shows a globe of Earth with the following latitude lines labeled from top to bottom: **Polo norte**, **Círculo polar ártico**, **Trópico de Cáncer**, **Línea del ecuador**, **Trópico de Capricornio**, **Círculo polar antártico**, and **Polo sur**. Red dotted arrows point from five empty boxes on the right to the boundaries between these lines: the top box points to the Arctic Circle, the second to the Tropic of Cancer, the third to the Equator, the fourth to the Tropic of Capricorn, and the fifth to the Antarctic Circle. Each box contains the word "Zona" followed by a blank line for the student to write the name of the climate zone.
