While Loop

Here, first the _____ is checked and if it's true, control will move inside the loop and execute the statements inside the loop until the condition becomes _____. We use this _____ when we are not sure how many times we need to execute a group of statements or you can say that when we are unsure about the _____ of iterations.

For Loop

Like the _____ loop, the For loop also allows a code block to be repeated certain number of times. The difference is, in _____ loop we know the amount of iterations required unlike While loop, where iterations depends on the condition.

Nested Loops

It basically means a loop inside a loop. It can be a For loop inside a While _____ and vice-versa. Even a For loop _____ be inside a For loop or a While loop inside a While loop.

Собери строку кода Цикл FOR

1. _____	6. _____	for	print
2. _____	7. _____	i	("Python")
3. _____	8. _____	in	:
4. _____		range	
5. _____		(5)
