

My Day at the Hospital

My name is Sara. I am thirty years old. I am a doctor and I work in a big hospital downtown. Every day, I get up very early in the morning, I have breakfast and I go to work by bus. At this moment, I am making my rounds and some of my patients are telling me about their jobs. First, I am seeing Ken. He has a very interesting job. He is in the air most of his time. He is a pilot but now he is not working because he is ill. Then comes Kim, she has two jobs. She is a teacher. She teaches science but now she is working at the hospital. She is also a nurse and she likes helping people. John is a colleague. He also treats people. He is treating a patient right now. He is a dentist. Oh, look! Here comes Tom! He is a waiter. He is serving my food. Now it is time to have lunch and then I will finish with the other patients.
