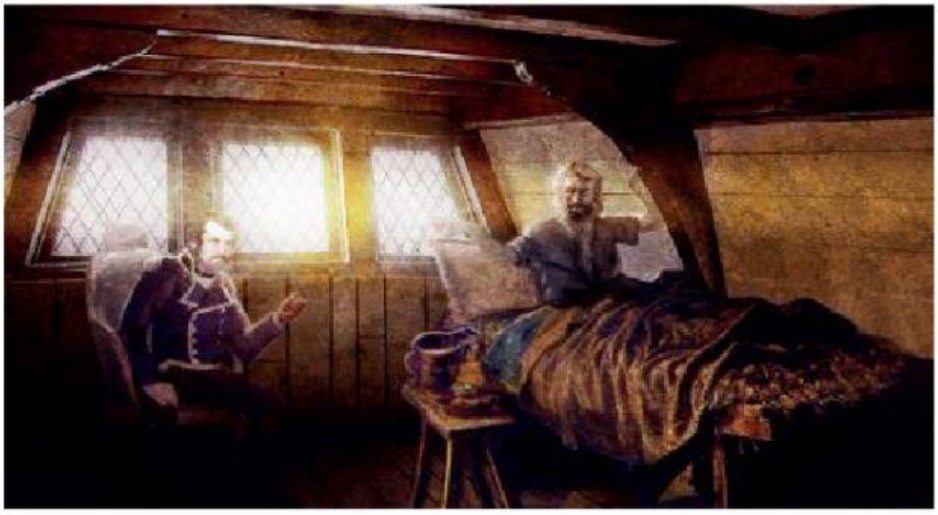
Chapters 1–2:



Robert Walton is an explorer. He's working on a ship in the cold Artic ice.

One day, he finds a man in the sea. The man was travelling across the ice, but his dogs died. He was alone. He looked sad and worried. Robert rescued the man and he starts telling Robert the story of his life.

"My name is **Victor Frankenstein**" – he says.

Victor's family adopts a young girl called **Elizabeth** and they move to Geneva. Two more sons are born, **Ernest**, the oldest and **William**, Victor's youngest brother.

Victor makes friends with a boy called **Henry Clerval**. Victor is very interested in electricity and chemistry and he goes to Ingoldstadt University to study.

He becomes obsessed with creating life and one cold, rainy night he created a creature from parts of dead bodies.

The monster comes to life. It opens its eyes and makes sounds. Victor is afraid of the monster, so he runs away and leaves the monster alone in his laboratory.

Victor becomes ill. However, some months later, Henry finds him and takes care of him. Finally, Victor is well again.
