

Grado: 5º

tema: Descomposición de números primos.

1. Completa cada descomposición .

The image shows eight prime factorization problems arranged in two rows of four. Each problem consists of a number followed by a vertical line and a prime factor. The goal is to complete the factorization by dividing the number by the given prime factor and writing the result below the line.

Problem	Number	Divisor	Result
1	42	2	
2	90	2	45
3	72	2	
4	80	2	
5	24	2	
6	63	3	
7	15	3	5 1
8	14	2	7
