How will the future be?

There are people who say that the future will be wonderful: machines will do all of our work, we will be able to travel from New York to Paris in one hour; no war will happen.

Other say that the future will be terrible: the food won't be enough ; we won't be able to move on the highways because there will be too many cars. And we'll blow up the world with our weapons.

People worry about the future because of the problems that will have to solve: population, urbanization, energy , pollution. We'll have to decide what is essential to life on earth and what is essential to our survival. if we can make these decisions now, at least we will have a future.
