Video from 3:35 to 5:54

Complete this text :

Australia began to prosper.

Australia exported

Explorers told their adventures and tales of Australia's

Australia became a with states.

Because Australia is a separate continent continent surrounded by water, you can find unique animals like kangaroos, wallabies and, a very funny animal.

There are also some of the animals in the world.

To sum it up.....

In Australia, the population is a mixture of:

A..... = the first inhabitants
people from who were explorers
and brought prisoners to the island.
And then immigrants from all around the world !

The End
