

The first conditional (esimest tüüpi tingimuslause)

Lihttuleviku puhul kasutatakse tihti if-lauset ehk kui-lauset (Ma teen seda, kui....)

Näiteks:

He'll pay me **if** I help him.

Ta maksab mulle, kui ma teda aitan.

If he needs some extra money, we'll get it for him.

Kui ta vajab lisaraha, siis me hangime seda talle.

If he doesn't take the summer job, **he won't have** enough money.

Kui ta seda suvetööd vastu ei võta, pole tal piisavalt raha.

Alati selline nõ paar:

Main-clause (põhilause): will + tegusõna algvorm ehk lihttulevik

If-clause (kui-lause): lihtolevik
