3 ★★ Correct five mistakes in Gaetan's post.  
Tick (✓) the three correct answers.

Many people say that the future will be better than the past, but I'm not sure.

If Unless we develop better ways of processing energy, we <sup>1</sup>harm the environment further.

And <sup>2</sup>if that <sup>3</sup>will happen, one day we'll need to go and live on another planet. What <sup>4</sup>will we do <sup>5</sup>unless we don't develop the technology in time? If we <sup>6</sup>ll travel to Mars, we'll need to produce our own water and air. Unless technology <sup>7</sup>doesn't move a lot faster, we <sup>8</sup>won't be ready to leave Earth for a very long time.

– Gaetan, China
