

Read the text and put the pictures in the correct order.

Ahmed started feeling ill on Friday morning. **He couldn't go to the mosque** for Friday prayers. His father thought that he just wanted to stay at home and he was angry. But Ahmed was really ill. By Friday evening, he had a temperature, a runny nose, a headache and a sore throat. All his bones were aching. **His mother took him to a clinic.** The doctor looked at Ahmed's throat and **listened to his chest.** She took his temperature and then she gave him some medicine to reduce the pain.

Ahmed and his mother went home. He **got into bed** and his mother **gave him some of the medicine.** It tasted horrible. Two days later, he had **spots all over his body.** **He had chicken pox!**
