

# Identifying Quadratic Graphs

Match the equation with the graph. Just drag the equation to the top left corner of the graph.

$y = (x - 4)^2 + 2$	$y = x^2 + 5$	$y = (x + 2)^2$
$y = x^2 - 4$	$y = x^2 + 3x - 4$	$y = x^2 - 3x - 10$
$y = x^2 - 5x$	$y = (x + 2)^2 + 1$	$y = x^2$
