

# **SUMAS**

**CENTENAS con decenas  
+  
DECENAS**

Observa el ejemplo, e intenta las sumas:

$$780 + 70 = 780 + 50 = 800 + 50 = 850$$

$$820 + 90 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$270 + 80 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$290 + 50 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

650 + 90 =  +  =  +  =

**360 + 50 =**  **+**  **=**  **+**  **=**

Intenta sumar directamente realizando el procedimiento anterior:

$$580 + 70 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$320 + 90 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$280 + 60 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$530 + 80 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$690 + 90 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$460 + 70 = \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$
