I always find it amazing to see how quickly my children learn new things. Obviously, I'm a proud father (I'm also amazed that I <sup>1</sup> *managed/could* to produce two such beautiful kids!), but they really do learn fast. Take cooking, for example. I <sup>2</sup> *can/could* just about cook to an acceptable standard now, but when I was ten years old, I <sup>3</sup> *can't/couldn't* cook at all.

I remember once when I tried to make soup, but <sup>4</sup> *wasn't/didn't* able to get the liquid right, and it was just a sticky mess. My daughter is ten now though and she <sup>5</sup> *can/could* already cook soups and pasta. OK, it's messy, she even <sup>6</sup> *could/managed* to get soup on the cat last week – a personal record – but she <sup>7</sup> *was able to/could* produce an edible meal. Amazing
