CLIMATE CHANGE

SELECT THE CORRECT ANSWER ACCORDING WITH THE READING
(SELECCIONA LA RESPUESTA CORRECTA DE ACUERDO A LA LECTURA).

Freepik

Climate change, or global warming, is a serious problem facing our planet. It means that the temperature of the Earth is getting hotter every year. This change makes our weather more extreme, and as a result, lots of animals and even humans won't be able to adapt to climate changes in the future. For example, warmer weather makes forests very dry and when a fire happens in an area where there is a lot of dry wood and grass, it is very difficult to stop it. These fires cause a lot of destruction and release lots of carbon dioxide into the atmosphere which is harmful to humans.

1. THE CLIMATE CHANGE IS A SERIOUS PROBLEM.

TRUE **FALSE**

2. THE CLIMATE CHANGE IS THAT THE TEMPERATURE IS COLDER.

TRUE **FALSE**

3. THE CLIMATE CHANGE MAKES OUR WEATHER MORE EXTREME.

TRUE **FALSE**

4. THE MEANING OF ATMOSPHERE IS "ATMÓSFERA"

TRUE **FALSE**
