(SELECCIONA LA RESPUESTA CORRECTA DE ACUERDO A LA LECTURA).

Climate change, or global warming, is a serious problem facing our planet. It means that the temperature of the Earth is getting hotter every year. This change makes our weather more extreme, and as a result, lots of animals and even humans won't be able to **adapt** to climate changes in the future. For example, warmer weather makes **forests** very dry and when a fire happens in an area where there is a lot of dry wood and grass, it is very difficult to stop it. These fires cause a lot of destruction and release lots of carbon dioxide into the **atmosphere** which is harmful to humans.
